

Contents

1	Introduction	1
1.1	Boundary Layer Meteorology	1
1.2	A Primer on Terminology	4
1.3	Application Topics	5
1.4	Structure of This Book	10
1.5	How to Use This Book	11
2	Fundamental Equations	15
2.1	Coordinate Systems	15
2.2	Principle of Momentum Conservation	16
2.3	Conservation of Mass	19
2.4	Conservation of Energy	22
2.5	The Surface Energy Balance	24
2.6	The Ideal Gas Law	28
2.7	Problems	30
	References	33
3	Governing Equations for Mean Quantities	35
3.1	Reynolds Decomposition	35
3.2	Flow Incompressibility	39
3.3	The Mean Equations for Velocity, Mixing Ratio, and Potential Temperature	41
3.4	Simplified One-Dimensional Equations	45
3.5	The Closure Problem	49
3.6	Quantifying Surface Eddy Fluxes	54
3.7	Problems	60
	References	66
4	Generation and Maintenance of Atmospheric Turbulence	67
4.1	Energy Pools and Energy Transfers	67
4.2	Budget of the Mean Flow Kinetic Energy	70
4.3	Budget of the Turbulent Kinetic Energy	74

4.4	Air Stability	80
4.5	Problems	87
	References	91
5	Flow in Plant Canopies	93
5.1	Canopy Morphology	93
5.2	Canopy Volume Averaging	94
5.3	The Mean Momentum Equations	97
5.4	Analytical Wind Profiles in the Canopy	99
5.5	Budgets of Mean Flow and Turbulent Kinetic Energy	103
5.6	Shear Instability and Transition to Turbulence	105
5.7	Problems	110
	References	113
6	Balance of Forces in the Atmospheric Boundary Layer	115
6.1	Introduction	115
6.2	Structures of the Land Boundary Layer	115
6.3	Structures of the Marine Boundary Layer	121
6.4	Balance of Forces in Neutral and Convective Conditions	123
6.5	Balance of Forces in Stable Conditions	129
6.6	Problems	134
	References	139
7	Tracer Diffusion in the Lower Boundary Layer	141
7.1	Basic Constraints	141
7.2	Point-Source Diffusion in Homogeneous Turbulence	144
7.3	Gaussian Plume Model for Elevated Sources	149
7.4	Diffusion from Ground-Level Sources	152
7.5	Diffusion in Plant Canopies	156
7.6	Footprint Theory	160
7.7	Problems	167
	References	170
8	Principles of Eddy Covariance	173
8.1	Introduction	173
8.2	The Canopy Source Term	174
8.3	The Concept of Net Ecosystem Exchange	177
8.4	The Chamber Method	178
8.5	The Eddy Covariance Control Volume	180
8.6	Eddy Covariance in Advection-Free Conditions	185
8.7	Vertical Advection	186
8.8	Horizontal Advection	190
8.9	Practical Considerations	195
8.10	Problems	196
	References	199

- 9 Density Effects on Flux Measurements** 201
 - 9.1 Density Effects 201
 - 9.2 Density Corrections to Eddy Covariance Fluxes 202
 - 9.3 Density Effects on Flux-Gradient Relation 207
 - 9.4 Density Corrections to Chamber Fluxes 212
